PETSc User Meeting 2018

Imperial College London, UK

June 4-6, 2018

LIVE DEMO

Let's enhance PETSc together!

*Debugging does not mean just trying a bunch of random things
with no understanding and hoping to figure out the problem.*

Create Pull Request in BitBucket

Fork the repository at `https://bitbucket.org/petsc/petsc/`

Create a new branch off master:

```
git checkout -b myname/mybranchname
```

Apply changes

Commit changes: `git commit -a`

Push changes: `git push -u origin myname/mybranchname`

Create pull request to master branch in main PETSc repository via webinterface

Prefer GitHub?

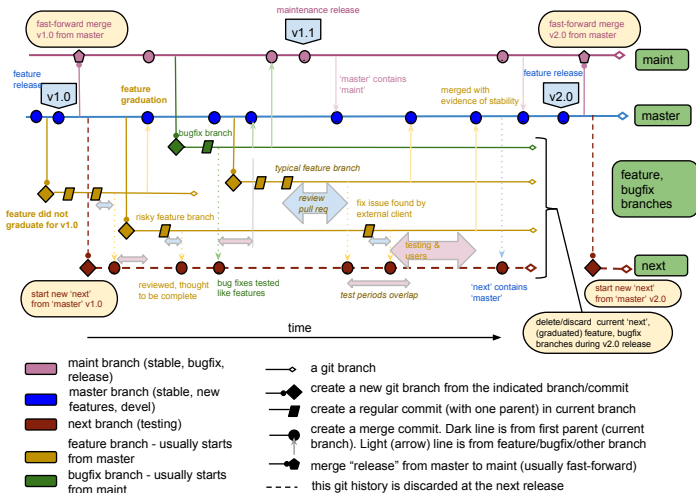

You may also fork our mirror at GitHub

Repeat steps above

What about all those branches in the repository?

git sucks!

PETSc's Workflow

Git is the perl of revision control systems.

PETSc and Git

Oh, yes we all do need that push!

PETSc and Git

It's like we only offer the black belt for people who currently have no belts.

PETSc and Git

If it ain't in email or slashdot then I ain't read it :-)

PETSc and Git

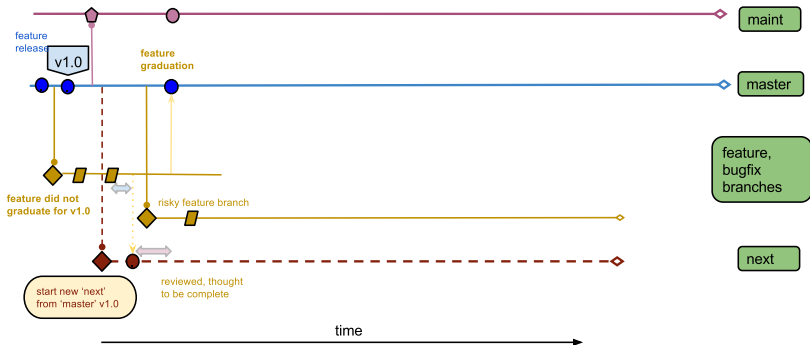

I have now permanently blackholed all email dealing with cygwin.

PETSc and Git

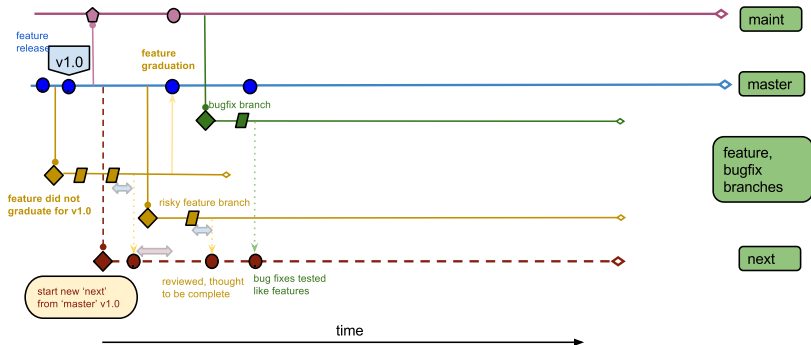

Peter, Matt gave some bad advice.

PETSc and Git

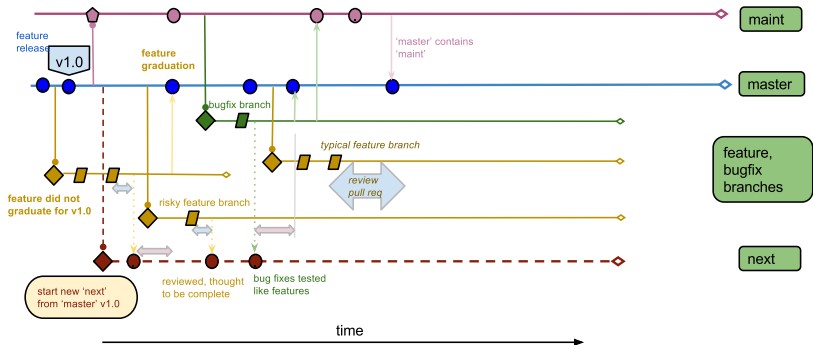

Satish, please put this in next with the other six million branches.

PETSc and Git

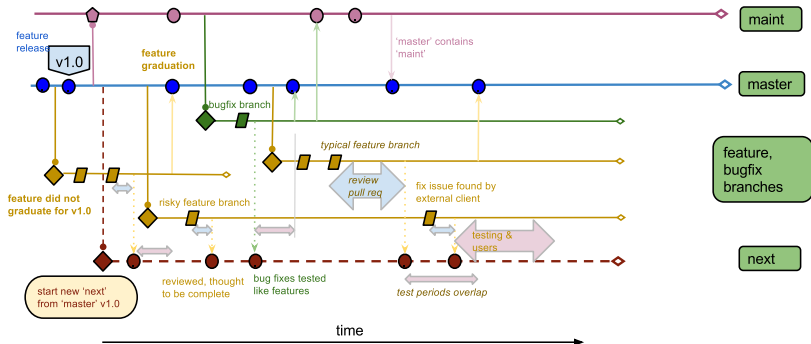

Don't tell anyone that I put a printf in here

PETSc and Git

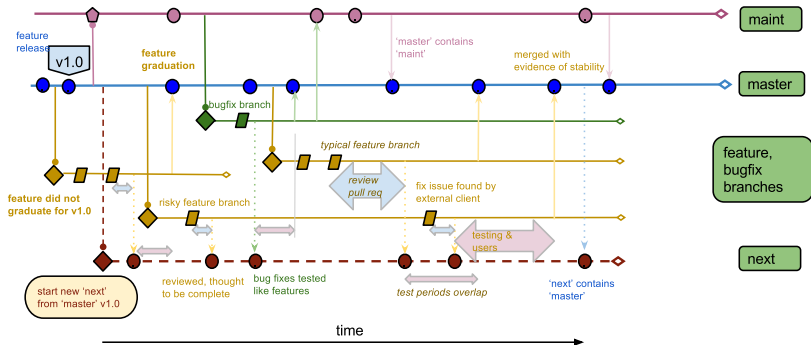

I won't call the ICNTL() monstrosity in MUMPS an interface :-)

PETSc and Git

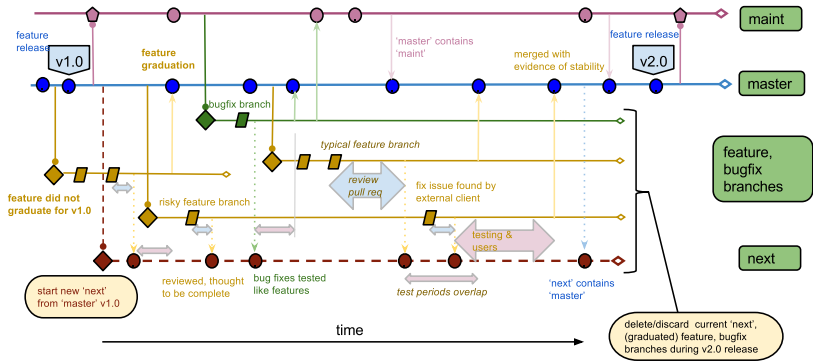

That is all I know about valgrind and it has saved my bacon many times.

PETSc and Git

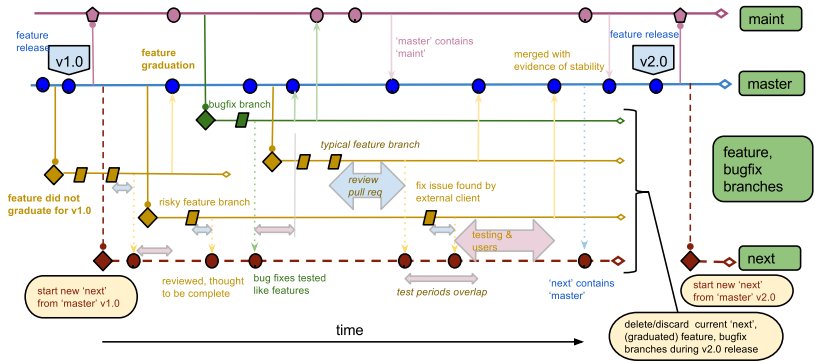

Stop right here. 99.9% of the time what you describe should not happen

PETSc and Git

Git is TeX, what we need is someone to come along and produce LaGit and thus make it usable.

PETSc and Git

*Git commands are like irregular verbs in a foreign language:
there's no all-encompassing logic to them, you just have to memorize
which words you need for each thing you want to express*

PETSc can Help You

- solve algebraic and DAE problems in your application area
- rapidly develop efficient parallel code, can start from examples
- develop new solution methods and data structures
- debug and analyze performance
- advice on software design, solution algorithms, and performance

`petsc-{users,dev,maint}@mcs.anl.gov`

You can Help PETSc

- report bugs and inconsistencies, or if you think there is a better way
- tell us if the documentation is inconsistent or unclear
- consider developing new algebraic methods as plugins, contribute if your idea works

Thank you!
